

AQD'S FOCUS ON THE DEPARTMENT OF VETERANS AFFAIRS

About The Acquisition Services Directorate

The Acquisition Services Directorate (AQD), a Federal shared-service provider within the U.S. Department of the Interior's National Business Center (NBC), offers acquisition support to all Federal agencies. We help managers in both civilian and military organizations fulfill their missions by crafting appropriate procurement solutions.

The Acquisition Services Directorate uses proven business practices while delivering cost-effective contracts. Our Contracting Officers will handle the complete acquisition lifecycle, utilizing innovative technology and value-added benefits.

Our Knowledge and Expertise

During the entire project, you have the benefit of the extensive knowledge base of our team of acquisition professionals who understand the complexities of the procurement regulations. We manage the whole process – from planning, soliciting and evaluating offers, to awarding and administering contracts, through closeout. Our Contracting Officers use all available options, including GSA Schedules, GWACs and IDIQs, to fulfill your requirements.

Since 1996, when AQD awarded their first \$50,000 contract on behalf of the Department of Veterans Affairs (VA), we continue to be a vital part of the VA history. This long standing relationship has resulted in an Interagency Agreement that provides all VA organizations with our assisted acquisition services. Our ability to work in partnership with the VA, to acquire the products and services needed to serve your overall mission in providing our nation's veterans with the high quality, prompt, and seamless service that they have earned, is an example of successful interagency collaboration.

Your Success

We are dedicated to transforming the government procurement process and our team is focused on bringing you quality results to give you peace of mind and ensure success.

Attention to detail, customer service and compliant contracting is what the Acquisition Services Directorate does best, so you can concentrate on meeting mission requirements on time, every time.
